\$2.00 A YEAR IN ADVANCE

TENNIS NOTES

The Carbon Lawn Tennis Club visited Hesketh on August 9th, to play the return match with the Hesketh Club. Carbon had won at home on May 20th by seven events to nil, but the Hesketh players did much better on their own courts, Carbon finally winning by five events to two.

After the match the Hesketh Club invited the visitors to a banquet in the Community Hall and proved themselves excellent hosts. Mr. J. Ridgwell of Hesketh gave a short address of welcome to the visitors, which was replied to by the President, H. Willson, and by W. A. Braisher, on behalf of the Carbon Club.

The following are the results and scores of Sunday's games:

Men's Singles—W. Edwards of Carbon defeated J. Knox of Hesketh, 6-1, 6-0. B. Ramsay of Carbon defeated T. Heath of Hesketh 6-5, 6-3.

Ladies' Singles—Mrs. Hunter of Hesketh defeated Mrs. Willson of Carbon 6-5, 6-4.

Men's Doubles—J. Macdonald and Bruce Ramsay of Carbon defeated A. Hunter and R. Reid of Hesketh 6-1, 6-3. W. Poxon and J. Fairbairn of Carbon defeated J. Ridgwell and J. Neilson of Hesketh, 6-2, 6-2.

Ladies' Doubles—Mrs. Hunter and Mrs. Chapman of Hesketh defeated Mrs. Willson and Miss V. Poxon of Carbon 6-5, 6-3.

Mixed Doubles—W. Edwards and Miss Mabel Ramsay of Carbon defeated J. Knox and Mrs. Chapman of Hesketh 6-3, 6-2.

WHEAT BONUS IN SEPARATE

"The five-cent bonus on wheat is separate altogether from the 35-cent initial payment on pooled wheat," declared Hon. Robert, Weir, Minister of Agriculture, last Friday night. The minister's attention was drawn to the confusion existing in Western Canada due to the belief entertained in some quarters that the five-cent bonus was included in the 35 cents.

"That confusion arises out of the fact that before the Western representatives went to Ottawa the pools had undertaken an initial payment of 30 cents a bushel. The announcement that this initial payment would be raised to 35 cents had no doubt created the misrepresentation that the additional five cents is the bonus money. That is not the case; it is merely an increase in the initial payment of 30 to 35 cents," the minister said. This will mean that with the five cent bonus paid by the federal government, that the net initial payment will now be raised to 40 cents per bushel.

Wheat crops in the Bassano district which promised only a light yield this year because of drouth early in the growing season, have been further restricted during the past two weeks by hot winds. The best yields now expected from wheat on non-irrigated lands in the vicinity of Bassano are from 10 to 12 bushels per acre.

Harvest Supplies

WESCO PUMP OILERS—All Sizes—Priced from ... \$1.00 to \$2.50

SWEAT PADS—Each 50c

NOSE BAGS, Each 25c

FEDERAL GOVERNMENT GIVES FINANCIAL BACKING TO WHEAT POOLS

New Initial Pooling Payment Fixed at 35 Cents

On Friday, August 7, a despatch from Ottawa stated Premier Bennett had announced that the Federal Government would back the Wheat Pools financially in the handling of this crop year. As a consequence the initial payment under the pooling plan has been raised to 35c a bushel, basis No. 1 Northern, Vancouver.

The despatch is as follows: OTTAWA, August 7.—A guarantee against panic conditions, an initial payment of 35 cents per bushel to the grain growers, and operation of the elevators of the western wheat pools and the terminals the same as privately owned enterprises are operated, are announced in an official statement by the Prime Minister this afternoon.

The statement reflects the outcome of the conferences during the week between the representatives of the Provincial Governments, the Wheat Pool and the Banks, along with John I. MacFarland, director of the selling organization. It is understood that Mr. MacFarland's services will be available, at least until the season is over.

Those who wish to market their grain on the pool principle as distinguished from the ordinary trading, may do so.

The Prime Minister's statement is as follows:

The Wheat Pools of the three western provinces, which own nearly 1600 country elevators, as well as terminals at Vancouver and Fort William, will operate this year in the same way as privately owned enterprises. They will have ample working capital, and the provinces will not be called upon to guarantee their operations.

As a substantial number of producers desire to market their grain on the pool principle, the elevators operated by the Pools in the several Provinces will afford to such producers an opportunity to have their grain dealt with by the operation of a voluntary pool. The elevators will make to such producers an initial payment of 35 cents per bushel on the same basis as to quality and point of delivery as in previous years.

The Dominion Government will take whatever action may be necessary to insure the orderly marketing of the crop of the year. Panic conditions will not be permitted to control the prices obtained for this year's western grain crop.

It should be noted that the bonus of five cents a bushel to be paid by the federal government is extra, above the 35c initial Pool payment.

When he touched power lines leading into a crusher plant of the cement works at Todd Inlett, B.C., Edmond Leonard Hogan of Edmonton, was instantly killed. Hogan's body was discovered by two companions on the roof of a disused building near an old quarry in which they had been swimming.

ALBERTA NEWS

At St. Paul, Alberta, the farmers expect to harvest the greatest crop in the history of the district and reports are that it will be equal to the crops in Saskatchewan in 1915.

An effort is being made to organize a boys band at Drumheller.

Harvesting commenced this week in many parts of Alberta.

The rumor that Premier Brownlee will quit the Alberta Premiership to enter the grain trade, has been denied.

When Ray King of the Claresholm Local Press awakened on Sunday of last week, he found that he had no car for the Sabbath's joy riding. He immediately notified the police, who recovered it in Lethbridge Sunday evening, abandoned on a side street and out of gas.

Announcement that the gas company will drill another well in the town of Brooks was published in last week's issue of the Brooks Bulletin. For many years the town was supplied with natural gas from two wells. About one year ago a third well was drilled to augment the lessening flow from the other two wells. The third well yielded only a small supply of gas, and now the company will drill a fourth well to meet the needs of the consumers.

A miraculous escape was experienced by the family of Peter Rennick, living about five miles north of Little Gem, when their house was struck by lightning last week. The family were all in bed when the storm broke and no one was injured. The house itself was very badly wrecked. A large house with five rooms upstairs as well as down, it had all four walls torn open and the cottage roof split asunder for its whole length, as though a terrific explosion of compressed electrified air had taken place inside and forced everything outward.

EXPRESS RATES TO BE REDUCED ON RAILROADS

Determined to fight motor truck competition to a finish, railway express companies are undertaking a comprehensive downward revision of tariffs. Several schedules of reduced rates have already been filed with the Board of Railway Commissioners, and as a Dominion wide survey of the situation is continued further decreases are to be made.

Questionnaires have been sent by express companies to manufacturers and jobbers in various parts of the country asking what rates would induce them to restore their patronage to the rail carriers. As the answers are received the companies are revising the schedules.

CONSOLIDATED CUTS TO SIX HOUR DAY; 20 DAY MONTH

TRAIL, B.C., July 31—Employees of the Consolidated Mining and Smelting Company, Limited, will, after the first of August, work a six-hour day and 20 days per month, according to an official announcement made by S. G. Blaylock, vice-president and general manager. In making his announcement Mr. Blaylock declared the company wished to keep as many employees as possible at work. His statement is as follows:

"In order to keep as many as possible of the old employees on the payroll the Consolidated Mining and Smelting company is dividing up such work as there is over the whole number of employees instead of laying off a portion of the men and keeping the rest employed full time.

"This will be accomplished in most cases by building up four shifts instead of three shifts, working 15 days and laying off 5 before returning to work for a second period of 15 days. This means a six-hour day and 20 days a month work."

CHRONICLE ADS PAY

EIGHT DOLLARS CONTRIBUTED FOR NAVY LEAGUE

Rallying to support the Navy League of Canada in its work of assisting the widows and orphans of men of the merchant marine service, Carbon citizens contributed eight dollars to this cause in a recent campaign conducted here by Fred Cooke, organizer of the Alberta Division. Any further contributions can be sent to V. J. Ward, secretary, 2140 Sixteenth st. W., Calgary.

7th Government Crop Report

(Issued by Dept. of Agriculture)

Rains have occurred in the north, north central and extreme southern part of Alberta during the past week. From Calgary to Macleod and in the East central part of the Province dry weather continues and crops are suffering severely. In the North central area rains were very heavy, totalling three inches of precipitation at some points. This excessive moisture has caused considerable lodging of grain and will tend to delay ripening. Extensive hail damage is reported at a number of points and freezing temperatures were reached at a few points in the Peace River District.

Cutting of wheat is in progress in the Southern part of the Province, and barley cutting has commenced. If favored with dry weather, cutting will be general throughout the Province within the next ten or twelve days.

No damage from serious insect or plant disease is reported.

Haying has been at a standstill in a large part of the Province during the past fortnight owing to continued wet weather and many fields of Sweet Clover and other kinds of hay have deteriorated in quality. A period of dry warm weather is urgently needed both for haying and hastening maturity of grain crops.

Pastures outside of the dry area are in excellent condition.

Potatoes and other special crops give promise of satisfactory yields.

Restricted by the gradually tightening conservation program of the Provincial Government, Turner Valley production in July was 23,171 barrels less than in the previous month.

WEDDINGS

BURTLES—KARY

A quiet wedding was solemnized on Wednesday afternoon last, August 5, in Calgary, when Elizabeth Kary of Carbon became the bride of Walter Burtles, also of Carbon. The Rev. Mr. Dickson of Knox Church performed the ceremony and witnesses were Miss Vera Poxon and Mr. Cyril Oliphant. Following the ceremony the wedding party returned to Carbon, and a wedding supper was held at the home of Mr. and Mrs. J.H. Oliphant. In the evening a dance was held in the Elks hall in honor of the occasion and a good sized crowd attended.

DAVIDSON—GRAY

A pretty wedding was solemnized at the home of Mr. and Mrs. H. Davidson, of Ghost Pine, on Monday when their son Claude, was united in marriage to Martha Gray. The Rev. Mr. Mann of Three Hills officiated. The bride wore a pale green ensemble of lace and georgette with hat to match and was assisted by Miss Marjorie Ticknor. The groom was supported by his brother Ray Davidson. Following the ceremony the happy young couple left for Banff, where they will spend a short honeymoon.

The bride is a former Carbon girl and taught school near here up until last year, when she took a position on the teaching staff of the Three Hills Public school. The groom is also known to many of the Carbon people, and is a resident of the Ghost Pine district, where he teaches school. He is also owner of the Ghost Pine store, at which point the couple will make their residence.

TRUCK GOES INTO CULVERT NEAR GARRETT MOTORS

A big Federal truck loaded with lumber went through the old culvert near the Garrett Garage on Tuesday afternoon. The truck was taking the lumber from the Atlas Lumber yard at Hesketh (which yard has been closed) to the Atlas yard at Acme and stopped at the garage for gasoline. The motor stalled and the truck backed up and stopped just at the old culvert, and the five tons of weight proved too much for the old culvert and the truck sank in up to the axle, the weight lifting the right front wheel clear of the ground. The driver went to Drumheller for jacks and the truck was taken out with little trouble.

"Tough luck," said the egg in the monastery, "out of the frying pan into the friar."

Cures For Depression

Among the thousand and one articles, speeches and interviews to which the people have been treated on the all-pervading subject of the existing economic and financial depression, there has at last appeared one courageous individual who preaches the rather unpopular doctrine that continued depression might be a good thing for the country.

The man advancing this opinion is George Richardson, newly-elected president of the National (United States) Association of Purchasing Agents, which organization, it is stated, represents the material buying power of the big republic to the south. Mr. Richardson takes a sharp rap at the professional optimist and the nostrum specialist in a special message to the members of his organization in the course of which he says:

"We are now in the second year of a corrective period, which in the judgment of many of us is a wholesome and much needed reminder that there are basic economic, as well as moral, laws which do not change with the seasons, and are not affected by mob psychology; and, when flagrant disregard for these laws attains the proportions witnessed prior to the close of 1929, the measure of retribution which is meted out to us is in proportion to the extent of their breach." Then follows his declaration that "it might be very beneficial in establishing a sound foundation for permanent recovery to have this period of fast and abstinence continue for awhile. There is no substitute for intelligence, hard work and close application to business."

Mr. Richardson, who thinks constantly in terms of buying rather than selling, finds that "business men need to have it borne in on them that they cannot get and hold something for nothing," and that "a return to hard work and a less extravagant living" are the only possible antidotes to "existing unsound tendencies which are manifest on every hand."

Contrasted with this statement of hard work and less extravagant living, which latter means less spending, is the view expressed by a writer in a well known Canadian financial paper. He says: "It has been stated that the solution of the present depression is hard work, economy and thrift. This has a nice sound but, unfortunately, the people who advance it do not clearly appreciate what the true effect of their recommendation would be. Hard work means producing and putting on sale a large quantity of commodities as we did in 1928. Economy and thrift mean spending as little as we can of our annual income and saving the rest. Doubtless by strict economy we could live on three billion dollars and save one billion of the four billion production in 1928. But if a four billion dollar production is put on sale and we offer only three billions for it, prices must be lowered and the producers accept a loss of one billion dollars. Then as only three billions were received, the producers will be forced to reduce wages and the opportunities for employment it can offer in the future by one billion dollars. Thus economy and thrift create the conditions that precipitate a depression."

Now, in our humble opinion, there is something to be said for both these points of view. Hard work we consider essential in this world. Extravagance should be curbed, and by extravagance we mean expenditures on non-essentials, or even on essentials beyond the ability of the buyer to pay for, and consequent running into debt. Thrift, not miserly hoarding, is wise and necessary, but it should not be carried to the extreme of denying one-self necessities, reasonable pleasures, and on what may be termed luxuries. Protection against old age, possible sickness, and an ultimate loss of earning capacity; in a word, assurance of a future competence is all that is required.

The trouble is, and prior to the close of 1929 it became widespread, that thousands of people do aim to get and hold something for nothing. It simply cannot be done. We must pay for what we get. Speculation ran riot; hundreds of thousands of people bought on the instalment plan beyond their ability to pay. The inevitable crash followed, and the depression was upon us.

There is a happy medium between the extremes of spending one hundred cents of every dollar earned, even going into debt beyond one's ability to pay, and miserly living in fear of the future and hoarding every possible dollar. That happy medium is to be found in (1) living within one's income; (2) small but regular savings, and these not merely hoarded but wisely invested in order that they may be available to expand industry, create employment, in a word, perform their proper function in the world; (3) expand one's expenditures in keeping with increase of income. In other words, every one's dollars should be kept busy.

To illustrate: Industry (and we include agriculture) produces. It pays for raw materials, wages, transportation, distribution, etc. The wage-earners, in turn, buy the goods and foodstuffs thus produced. Thus the money paid out in wages returns to industry, to again be paid out in wages, to again return to industry. The more frequently a dollar is thus turned over, the greater the production, the larger the total of wages paid, the greater the business turnover of the nation; hence the greater the prosperity, and the absence of a depression.

This, we believe, is sound economics and good finance. It is, however, necessary to add that while the above observations apply to industry generally, including agriculture, there are seasonal conditions, such as the present widespread crop failure, which cannot be overcome even by the hardest of hard work, the strictest economy and thrift. These exceptional conditions must be met by exceptional remedies. They are, however, exceptions which do not nullify the truth and strength of the general policy to which expression has been given.

More than 3,000 miles of new airways will be lighted this year in the United States.

About the only difference between the old dime novel and one of today is \$1.90.

Could Not Check the Summer Complaint A Few Doses Did It

Mrs. R. Coulter, 918-11th Ave. E., Calgary, Alta., writes:—"Last summer my youngest son was very bad with summer complaint, and everything he ate he would vomit, and he got so thin I became very much worried. I could not get the discharges checked, so I went to the druggist and he gave me a bottle of Dr. Fowler's Extract of Wild Strawberry and told me it would stop the trouble if anything would. After I had given the boy the first few doses I noticed the discharges were being checked, and it was not long before he was well again."

Awards For the Blind

Gold, Bronze and Silver Medals and Cash Awards For Sightless

Achievements of the blind in Canada and the United States were recognized by the Harmon Foundation in the granting of 109 awards to sightless men, women and children.

Gold, bronze and silver medals, and cash awards of \$2,500, were given to individuals who had disregarded the handicaps of blindness in their efforts toward accomplishment.

Canadian recipients are:

Dr. A. T. Barnard, Edmonton, \$50 and bronze medal for achievement of economic value; Joseph Clunk, Toronto, \$50 and gold medal for accomplishment or progress in first two years of blindness.

Edgar J. Miller, Swift Current, Sask., \$20 and bronze medal for participation in home activities; Adolphe Renault, Montmagny, P.Q., \$10 for achievement of economic value; M. C. Robinson, Victoria, B.C., \$10 for achievement of economic value, \$20 and bronze medal for accomplishment of progress in first two years of blindness, and \$20 for participation in home activities.

For improvement of children in schools for the blind, the following schools were represented, each pupil receiving \$5 and a bronze medal: Ontario School for the Blind, Brantford, Ontario; School for the Blind, Point Grey, B.C.

Cruise Was Successful

Dr. Eckener Satisfied With Zeppelin Trip To Arctic

Home from the top of the world after a week's cruise, the Graf Zeppelin landed at Friedrichshafen, Germany, amid lusty cheers of thousands who flocked to the airfield instead of going to work.

"It was a splendid and highly successful cruise," Dr. Eckener said. "Some people may have thought we were out in a dreadful region of ice and extreme cold, but from the very beginning we never doubted for a moment that this would be a relatively easy trip. Often we enjoyed skies of Italian blue and we never were bothered by the discomforts of the Arctic."

"Many people thought we did not accomplish all we set out to do, but perhaps we did not mean to do all that some papers said we intended. I hope this cruise will have a two-fold result, namely, that we may soon make another journey to the Arctic when we can get the necessary funds together, and that the Graf Zeppelin will become a favourite with tourists who feel the call of the north."

Persian Balm the creator and preserver of beautiful complexions. Tonic in effect and wonderfully stimulating. Safeguards and beautifies the most delicately-textured skins. Cools and relieves all skins flushed or irritated by weather conditions. Magical in results. A little gentle rubbing and a youthful freshness and daintiness is instantly created. Invaluable for softening the hands and making them flawlessly white. Truly the perfect toilet requisite for the woman who cares.

How To Read a Book

Lord Macaulay said: "When a boy, I began to read very earnestly, but at the foot of every page I read I stopped and obliged myself to give an account of what I had read on that page. At first I had to read it three or four times before I got my mind firmly fixed. But I compelled myself to comply with the plan, until now, after I have read a book through once, I can almost recite it from the beginning to the end."

It Will Prevent Ulcerated Throat.

At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.

Oldest Ship Afloat

Believed to be the oldest ship afloat, the "Success," the sole survivor of the old-time convict fleet which sailed between England and Australia, has been kept in her original state and now is sailing around the world as a "side show."

One-piece bathing suits are practically taboo in Argentina.

Happiness often depends upon what we do with our spare time.

W. N. U., 1902

ENO'S "FRUIT SALT"

The Safest, Surest Way To Health

The daily dash of ENO in a glass of water every morning is the safest, surest way to inner cleanliness. And to be inwardly clean is to be healthy.

ENO'S "Fruit Salt" is a delicious health beverage that tones and sweetens the entire system. For constipation, acid stomach, fatigue and biliousness it is without equal.

But remember, only ENO can give ENO results.

Long Journey On Skis

Major Scott Crossed 500 Miles Of Arctic Ice

Major James M. Scott, member of the British Aero-Arctic expedition to Greenland, arrived at Ivigut July 20 after having crossed the inland ice on skis from Lemon Rose camp, Angmagssalik Fjord.

The British Expedition to Greenland, which has been there a year, is obtaining data for use in mapping an air route from England to Canada.

Major Scott left Lemon Rose camp July 1 on the journey across the ice to Ivigut, a distance of almost 500 miles.

Miller's Worm Powders, being in demand everywhere, can be got at any chemist's or drug shop, at very small cost. They are a reliable remedy for worm troubles and can be fully relied upon to expel worms from the system and abate the suffering that worms cause. There are many mothers that rejoice that they found available so effective a remedy for the relief of their children.

Time Is Extended

Canadian cattle destined to British markets may be carried on open decks until November 1, Hon. Robert Weir, Minister of Agriculture, has announced. The extension of one month from the usual closing date of October 1 was made possible through representations conveyed to the British authorities by Hon. G. Howard Ferguson, Canadian High Commissioner.

Homing pigeons were used by the Roman army to carry messages in wartime at least as far back as 43 B.C.

Does Away With Guesswork

New Device Is X-Ray and Radium Meter

The "X-Ray Yardstick," a device to make use of X-rays and radium safer, was adopted by the Third International Congress on Radiology at Paris.

The device is a portable machine which measures the "dosage" of X-rays accurately. It is an X-ray and radium meter. Its adoption means that for the first time there is a standard unit for use in all countries in measuring short-wave radiation.

The importance of this agreement lies in the destructive powers of X-ray and radium, an overdose being as bad as too little, and occasionally even fatal. The difficulty with X-rays has been worse than with radium because the intensity of radiation varies greatly with differences in the numerous varieties of X-ray tubes.

There has been necessarily much guesswork, and also sometimes confusion among radiologists in one nation about applying the progress of their fellow workers in another part of the world.

The meter was developed by Dr. Lauriston H. Taylor, of the United States Bureau of Standards.

Asthma Overcome. The triumph over asthma has assuredly come. Dr. J. D. Kellogg's Asthma Remedy has proved the most positive blessing the victim of asthmatic attacks has ever known. Letters received from thousands who have tried it form a testimonial which leaves no room for doubt that here is a real remedy. Get it today from your dealer.

Air parcel post service has been established between London, England, and Karachi, India.

So Many Home Uses!

Keep foods fresh longer by covering them with Para-Sani

Use Para-Sani to keep Dad's lunch tastily fresh

Keep the freshness in sandwiches prepared for the party with a covering of Para-Sani.

YOU'LL FIND A hundred vital, saving uses for Para-Sani Heavy Waxed Paper in your home. Comes in handy, sanitary, knife-edged package. For less exacting uses: "Centre Pull" Waxed Tissue (flat sheets). At grocers, druggists, stationers.

The Prince Of Wales Greets Delegates To The Congress Of Universities Of The Empire

The Prince of Wales' greeting to the delegates to the Congress of Universities of the Empire in the Guildhall, London, England, recently was a Royal welcome in more than one sense and it was received with evidence of hearty approval. His Royal Highness began his address as president of the congress (which held its business meetings in Edinburgh, Scotland, a few days later) by reading a message which he had sent the King and His Majesty's reply thereto, the one loyalty and devotion and the other expressing pleasure and welcoming the delegates, especially those from overseas.

The Prince recalled the fact that the eight universities of a century ago had become 53 by the time the first congress met, and the delegates now assembled or assembling come from 70 different universities. Nearly 90 of them have crossed the seas to attend the congress.

The core of the Prince's subject was the need of educated men today, not only to fill high official posts everywhere in the British Empire, but to serve our commerce and industry—vital needs at home and abroad. In a special word of welcome to the overseas visitors he spoke of the "other and better ties," among them the universities, which, he liked to think, were displacing those more material links now fast disappearing, which had bound the empire together in the past.

"With the growth of our population, our commerce, and our national wealth has grown the need for advanced education, until nearly every great city possesses its university," His Royal Highness said. "At the same time, the duties and responsibilities of universities have increased in equal measure. The need of men today is greater than ever. Year by year, as the scope of our activities increases, men are called for in every part of the empire, not only to fill the higher offices, the services, and the government and municipal administrations, but to carry on the commerce and industry which are vital to our existence."

"I particularly welcome the presence of so many delegates from overseas, because the old concrete ties which joined our empire together in the past are fast disappearing, and I like to think that they are being replaced by other and better ties, which, though less formal, less tangible, in Burke's words, 'though light as air are as strong as links of iron.' Among those links surely there can be none stronger or sounder than the universities of the empire. We have a common history and to a great extent community of race and language, of tradition and of interests. This congress adds the advantage of personal contact and enables us to meet together in social and intellectual intercourse, and to talk over the common problems which beset us all. In a word, it gives us an opportunity of co-operation which is quite as valuable an education as it is, to my mind, in most of the other phases of our lives. And it seems to me that you have it in your power not only to contribute to the solution of educational problems, but to strengthen the organization and to draw closer the finest ties of empire."

The tiger will not eat an animal not killed by himself.

"They snore so comfortably together that I am beginning to think there must be something in love after all."—Simplicissimus, Munich.

W. N. U. 1902

Lamps Of the Ages

Museum At Munich, Germany, Has Most Interesting Collection

The German museum at Munich has added an interesting feature to its exhibits in the shape of a collection of street lamps. The collection starts with the first street light used in Paris, a pitch basket. The oil light is represented by an old rapeseed oil lamp. The third, a gas light with five flames, was used in London in 1814. The collection includes lights up to the most modern incandescent lamps.

By Annette

THIS SPORTIVE JACKET DRESS—SO VOGUISH THIS SEASON

An exceptionally attractive model is this with freshness and charm, so beloved by youth.

The dress was developed in pale blue crepe silk with royal blue dots. There were narrow bindings at the neck and armholes. The jacket reversed the colour scheme to carry out snappy contrast in royal blue with pale dots. The lighter tone crepe appeared again as trim on the jacket.

And it's so easily copied. And at a surprisingly small cost.

Style No. 314 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

Pastel flat washable crepe silk, shantung in plain or printed, linen, cotton meshes, wool jersey and shirting fabrics also suitable.

Size 36 requires 3½ yards 39-inch with 2½ yards 39-inch contrasting. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Might Let Them Try

Question Is Would Women Rule Country Better Than Men

Somebody in Portland suggested the other day that, since men had made such a hash of running the country, it was about time to give the women a chance.

Somebody else replied that women had a majority of the votes already and, if they wanted to run the country, they could do it. He (yes, of course, he was a man) said that women were quite content with "their place in the home."

Then the war began. Letters to the editor, pro and con, filled the columns of the papers.

One woman said that if her sex were running the country they would at least not let people starve. She was probably right. That's just the sort of thing a woman would think of first.

It's the sort of thing that Mary Ellen Smith, Agnes MacPhail, Nancy Astor, Margaret Bondfield and their sister parliamentarians keep harping on, to the annoyance of their male men colleagues.

Should women rule? There have been some extraordinarily capable women monarchs, Elizabeth, Victoria, Catherine the Great and others. But they had male advisers. The women have never had a complete innings of their own.

Would Canada be a better country if the House of Commons had 244 Agnes MacPhails and only one Bachelor Bennett raising a feeble voice for his sex from the back benches? Would a city council, all women, make a better job of running Vancouver?—Vancouver Sun.

Reach Remarkable Age

Triplets, 90 Years Old, Live On Three Continents

Exceeding the proverbial three score and ten by an additional 20 years, Charles Mayhew, the eldest by three-quarters of an hour of boy triplets, is shortly to celebrate his 90th birthday. Mayhew's two brothers live in Canada and Australia, thus making the veteran triplet combination an empire-grown product.

Charles Mayhew lives in the King's Cross district of London, England, and was formerly Charles Dickens' shoemaker. Mayhew says that in Dickens' "Our Mutual Friend" there is a picture of him at his work.

The finish of the Russian war is named by Mayhew as the most glorious day of his life. St. Paul's was lit up in celebration of the occasion; the whole shape of the cathedral was there in gaslight. Mayhew sang at the funeral of the Duke of Wellington. As a boy he sang at St. Clement Danes.

Mayhew worked at his trade until he was 86. He eats, as he puts it himself, "everything that comes to hand." He has a standing challenge open to any man over 70 to walk to Cambridge, a distance of about fifty miles. Mayhew will use a pair of shoes made at his own bench. He expects to see his 110th birthday in good health.

SHY LITTLE GIRL AND THE KING

Patricia Osborne (aged two, a little patient in the King George Hospital, Ilford, England, which H.M. the King opened this month, photographed in her cot with her teddy bear. When King George visited the children's ward he took little Pat in his arms, to the astonishment and envy of the other children in the ward.

The March Of Grasshoppers Which Ravage The Countryside Is One Of Nature's Mysteries

J. V. McAree, in Mail and Empire:

Not living in Nebraska which is being ravaged by a plague of grasshoppers which has already done millions of dollars worth of damage, one can view the thing as a phenomenon rather than as a calamity. The stories from Nebraska tell of trees, grass, clothing and even posts being devoured by the myriads of insects as they pursue their unpredictable path for ends that remain wrapped in mystery. It is a common notion that grasshoppers swarm over a countryside in search of food. This is no more true than it is true that the occasional migration of the lemming are occasioned by a sudden and uncontrollable desire to have a swim. The death of the lemming in the ocean, and the destruction of the crops in the path of the grasshoppers seem to be mere incidents to a deeper mystery which perhaps is connected with the migration of birds which science has yet been unable to explain. Perhaps it is the same urge in the golden plover, the Arctic tern, the little rodent of Scandinavia and the grasshopper in Nebraska. One may be observed as a beautiful phenomenon, while the other may be a natural disaster comparable to an earthquake or the eruption of a volcano.

Some months ago there was an article on Asia by R. W. G. Hingston, the famous English explorer, who has observed grasshoppers in flight or on the march in different quarters of the world. Major Hingston says: "Their wanderings have no relation to food. They do not pick out the luxuriant places; the arid soil appears to suit them every bit as well as does the greenest tract. They march past places rich in food, scarcely heeding them beyond nibbling a little, and on to barrenness once more. Indeed when actively on the march they will not stop even to nibble if they come upon some luscious patch." It is by day that the hoppers show activity. When night falls they halt and spend the hours of darkness either upon the plants they happen to have lit upon or under stones or clods. When it becomes light again they begin to stir, and soon are once more on the march. This observer has calculated that they advance a mile in about three hours. They travel alternately by creeping or jumping, all headed in the same direction.

If one regards the main body as an advancing lake of colour, he will find parallel with it several other lesser bodies like streams. These are made up of grasshoppers, too, moving in the same direction as the chief host. On the march they not only do not appear to be on the lookout for fresh pastures, but they indulge cannibalistic practices which are not observed at other times. If one of them is injured the others will

immediately attack it, drawing from the body whatever juices it may contain. Major Hingston, struck with the fact that no matter how isolated from the mass some of the hoppers might become, they still maintained their sense of direction, caught a few and whirled them round in a tin box, thinking that they might be disoriented. But as soon as they were turned loose, they resumed their old course, faithful as the needle to the pole. Can these swarms have any connection with the metamorphosis which the insects undergo? The fact that they occur before the final moult is interesting.

A locust moults five times, and it is only with the final moult that its wings are capable of bearing it through the air. Before they develop it remains a hopper. Then it advances a stage and its wings are suitable for carrying it forward, for short distances on the principle of a glider. Presently they become strong and it can soar in the air. Usually as a swarm advances, it will be seen, if kept under observation, that the flying insects keep on increasing, so that a body which set forth composed exclusively of hoppers may reach its destination as a winged host. This is one of the most thrilling sights of nature. This immense army whose numbers must be reckoned in the thousands of millions literally fills the sky. Its progress is curious for while the insects seem to be headed in one direction they really advance at right angles to it. The depth of the swarm can only be guessed at but it may be two miles thick, and because of different air currents the various strata are often seen to advance at different rates of speed.

Sometimes the whole mass will be seen suddenly to change its direction as though upon a common impulse. Stragglers reaching the same spot hours afterwards will also turn as though a guide post had been left for them. For centuries mankind has been trying to cope with the locust plague, and in recent years with the invention of poison gases and flame throwers have met with more success than for thousands of years earlier. The time to attack the insects is before they have sprouted their wings. Trenches can be dug in their line of march, and the locusts destroyed as they tumble into them. Efforts to exterminate them by digging up the ground in which their eggs are laid have met with only partial success. Once they have finished their fifth moult and have taken to wing they are impossible to deal with, and the only hope is that they may take their way out to sea like the lemmings and return no more.

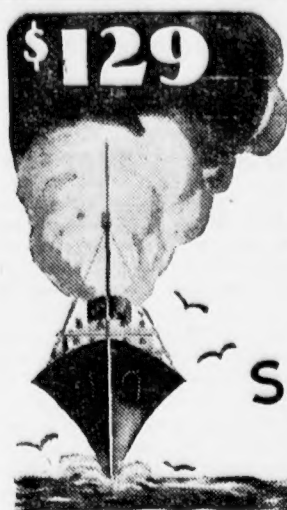

Victory For the Snail

Word comes from London that the creature which has known the world over for its sluggishness—the snail—has won a victory over the world's fastest vehicle—the airplane. The British Royal Air Force field at Lake Habbaniya, near Bagdad, recently became overrun with countless snails. After all other means had been tried to get rid of the creatures, the Royal Air Force had to pack up, bag and baggage, including flying machines and all equipment, and move to another base.

"My doctor says that sleeping outdoors tends to make one beautiful." "That explains the charming appearance of most tramps!"

"Waiter, we want chicken. The younger the better." "Then, hadn't you better order eggs, sir?"—Wahre Jakob, Berlin.

TO GREAT BRITAIN and back

SPECIAL REDUCED third class fare from Montreal to Belfast, Glasgow, Liverpool, Plymouth or London and back. Good going from

Aug. 1st to Oct. 15th

Return portion valid for 2 years. Round trip rate to Continental points reduced proportionately.

Two sailings a week.

WORLD HAPPENINGS BRIEFLY TOLD

The Royal Air Force plans to go ahead with its proposed attempt to set a new long distance flight record, it has been announced.

The north Pacific flight, undertaken by Seiji Yoshihara, 27-year-old Japanese aviator, has been abandoned definitely for this summer.

The 17th anniversary of invasion of Belgium by the German army was commemorated throughout the country.

Cost of the recent wheat conference at Canada House, London, England, was \$5,522.63, according to a return tabled in the House of Commons at Ottawa.

Civic officials of Kingston, Ontario, attended the opening of the Field Worsted Mill, Kingston's newest industry, which has a Canadian turnover of \$1,000,000.

Racial classification of the United States population announced by the census bureau, shows marked gain in Negro growth rate and a slight loss in white growth rate.

The destruction of the Cathedral of the Redeemer, one of Russia's largest and most imposing churches, has been begun to make way for the building of a great auditorium to be known as the Palace of the Soviets.

Sir Harry Lauder, famed Scottish comedian, was 61 years old August 4, and is as energetic and cheerful as ever. He recently returned from a tour of South Africa, following a 60,000-mile jaunt through America.

"Empress of Britain" recently steamed into Father Point from Cherbourg in exactly four days and a half, thereby breaking her own westbound Atlantic record by half an hour. The ship also clipped several hours off her Southampton-Quebec record.

Another Freak Growth

For many years Greensburg, Indiana, has boasted of a tree growing out of its courthouse roof and now, as another inducement to tourists, it exhibits a stalk of corn growing out of a tree. The stalk, two and one-half feet high, is growing from a crotch in a maple tree, 15 feet above the ground. Edgar Waters, who owns the tree, says the stalk will bear corn.

Dried Egg Plant

Fifteen million eggs a year are being used in a dried egg plant in Winnipeg, this being one of the city's new industries.

BORDEN'S CHOCOLATE MALTED MILK IS GOOD AT ANY TIME

HERE is a delightful change for noon day luncheons, picnics, and outings, that your children will love. Borden's Chocolate Malted Milk is rich and creamy, with a real MALT flavour that puts a finishing touch to any meal. Buy a tin of Borden's Chocolate Malted Milk today—your dealer has it in pound and half pound sizes.

SUNDAY SCHOOL LESSON

AUGUST 16

SOWING AND REAPING — TEMPERANCE LESSON

Golden Text: "Be not deceived; God is not mocked; for whatsoever a man soweth that shall he also reap." — Galatians 6.7.

Lesson: Galatians 6.1-10.

Devotional Reading: Isaiah 5.11-15.

Explanations and Comments

Deal Gently With Another's Trespass, verse 1. — "Brethren," wrote Paul to the Galatians, "if a man be caught in a sin, do you who profess the spirit of Christ set him right," correct him, and bring him back to right actions. The Greek verb means bringing the man into his place: it is a metaphor taken from a dislocated limb brought back by a skillful surgeon into its true position.

"We are to be experts in re-setting broken wills, and in repairing broken consciences, and in mending broken hearts. And there is far more work than we have doctors, and so the fallen are becoming the hopeless and the dying."

Restore such a one in the spirit of gentleness, for the man who has suddenly fallen into sin is not a hardened sinner, and should be dealt with leniently, and remember that under similar temptation you also might yield and need a similar forgiveness.

"There is no sin which any man hath done, but another man may do the same." — Augustine.

Share Another's Burdens, verse 2. — Bear ye one another's burdens. Another's weakness, his yielding to sudden temptation, his sorrow and remorse, may be his burden. Sympathetically share his cares and his sorrows. By obeying this exhortation you will be fulfilling the law of Christ, for Christ's law is love (see Matthew 8.17).

Avoid Self-Deception, verse 3. — The connection of this verse with the preceding one is evidently that one who refuses to bear another's burden does so from a mistaken pride, from a false idea that he is somebody too exalted to stoop to another's burden. Yet in the sight of God he is only as sounding brass and tinkling cymbal, he deceiveth himself.

Do Not Test Your Conduct By That Of Others, verse 4. — Let each man test his own conduct by the example of Christ, and then, if he stands the test he may rejoice because of his own merit and not because he is better than his neighbor. He should not take others as a standard, and rejoice because he is better than some weaker or worse man. Recall the Pharisee's boast, "Lord, I thank Thee that I am not as other men," and compare with it Paul's glorying, "By the grace of God I am what I am."

The Law Of Harvest, verses 7, 8. — Be not deceived, God is not mocked, as they seemed to think they can mock him who expect to escape the consequences of their actions. "God cannot be treated with contempt without provoking His righteous punishment." — Philip Schaff.

"For whatsoever a man soweth, that shall he also reap." This is God's law of the spiritual harvest.

"Wild oats take something out of the soil of a man's life that no system of crop rotation can restore" (The Youth's Companion).

We usually think of this verse as referring to retribution for wrongdoing, but the happier meaning is equally true that "he who sows wheat reaps wheat, not tares."

"Life's fields will yield—as we make it—

A harvest of thorns or of flowers."

—Alice Cary.

Verse eight is a particular example coming under the general truth expressed in the preceding verse. The "flesh" is here thought of as the evil nature: "He that tills the field of the carnal life," shall reap a harvest doomed to perish, but he who tills the field of the spiritual life shall reap eternal life. "The heart sows into the Spirit whenever in thought or deed his prompting is obeyed and his will made the law of life." — G. S. Findlay.

Nervous Traveller: "But suppose there is an accident and the train is dashed to pieces?"

Porter (cheerfully): "No need to worry. We've got plenty more trains."

To Combat Tuberculosis

Remarkable Recoveries Reported From Use Of Native Remedy

Should the announcement be made that a positive cure had been discovered for that dread scourge tuberculosis, and should the claim be substantiated by incontrovertible evidence, what a sensation it would cause. Recently there has come to the hands of the writer a most remarkable book entitled "Tuberculosis, Its Treatment and Cure With the Help Of Umckaloabo." The author of this book is a well-known English physician, and the publishers are B. Fraser & Co., 62 Pepys Road, Cottenham, Park, London, S.W. The author who has been responsible for several previous medical works, candidly sets forth the fact that he was quite sceptical regarding the merits of Umckaloabo when it was first drawn to his attention. Medical men are very conservative about new treatments, and rightly so," says the author. "A year ago I was as profound a sceptic as to the existence of a remedy or cure for consumption, outside the orthodox methods which consist of sanatorium or open-air treatment, as any of my professional colleagues throughout the country."

In 1897, a young English engineer, living in Birmingham, contracted tuberculosis, and was advised by his physician to go to South Africa. This he did, and during his sojourn there was induced by a native medicine man to try a preparation made from the root of a native plant, known locally as Umckaloabo. To his great surprise he at once began to improve, and very soon his health and strength had completely returned. Major Stevens, the man in question, and who by the way, served with distinction during the Great War, had no return of the trouble which he suffered from thirty-one years ago. The author investigated this case, but needed further corroborative evidence before becoming fully convinced of the merits of the treatment. He accordingly personally investigated over fifty other cases and was finally forced to accept the genuineness of the discovery in the face of the large number of remarkable recoveries. He mentions the fact that a doctor of Geneva, Switzerland, has treated some 750 cases with Umckaloabo during the past ten years, and claims to have cured the great majority.

Among the fifty odd cases investigated by the author was that of a man who in May, 1920, was certified by his local doctor to be suffering with pulmonary tuberculosis, and the diagnosis was confirmed by two other doctors in the neighbourhood, so there was no possible doubt about the existence of the disease.

The symptoms were cough, expectoration, debility, loss of weight, and later on there were several haemorrhages. Following one of these he was removed to Brompton Hospital in July 1920, where he remained for seven weeks, and from here he was sent to The Downs Sanatorium, Sutton. The fact of his remaining for seven weeks at Brompton Hospital suggests the severity of the disease, as it is not usual to keep cases there so long. Indeed they are usually transferred to a sanatorium as soon as there is a vacancy. He remained at The Downs Sanatorium for ten weeks, but appears to have made no progress, for in November of the same year he had a bad haemorrhage, he was 2 st. below his normal weight of 11 st., and the symptoms of the disease showed no signs of diminution. He discharged himself, because, as he says, he was getting no better; in fact, he felt he was going downhill, and was so bad that he had to be conveyed home in a cab.

At this juncture, November, 1920, he commenced to take Umckaloabo, having heard of it from a nurse, whose brother claimed to have been cured of tuberculosis by it. He was still losing weight, was very weak, and the symptoms were, in his opinion, more pronounced than they had ever been before.

The subsequent history was as follows: an improvement began to take place at once, which was commented upon by the doctor in attendance. Five weeks after commencing the treatment he had gained 1 st. in weight. In January, 1921, his strength had increased, so that he was able to take fairly long walks, and the expectation had diminished by one-half. By April, when examined at the Local Centre, his weight increased by a further 12 lbs. His steady improvement was maintained in the succeeding months, except for a short period when, being without the treatment, some of the symptoms showed a tendency to return.

Towards the end of June, 1921, he was still improving; his weight had increased to 11 st. 7 lbs., and the sputum, for the first time, was negative. Six months after commencing the treatment he was strong enough to take up work as a plasterer's labourer, and he continued at this

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE:—Captain Jimmy and his friend Lieut. Jed Stone, plan to rescue Guy Stone from the cruel Chinese bandits. They bargain with General Fu for his assistance, in exchange for flying him over to Japan.

We worked secretly on our 'plane for several days, changing it to look like a fire-eating dragon. The body, we covered with phosphorous paint which would glow green in the dark, while a long dragon tail was attached behind. We painted bat-like marks on the wings, and wicked-looking claws spread out underneath. Even in the daytime our 'plane looked horrible enough, but at night it was

enough to freeze any ignorant bandit camp with fear. Of course, that is just what we intended our motor to do. While the bandits fled in terror, we would have a chance to rescue Guy Stone, the brother of Lieutenant Stone, who had been held captive for many weeks.

As the sun sank toward the western sky line, we wheeled our 'plane out of the hangar and soon were heading full speed toward the cruel Chinese bandits' camp. We timed our raid so we would arrive just after dark, while the bandits were still astir.

As we passed over the countryside, the poor Chinese families hearing the drone of our motor rushed to the doors of their hovels. Seeing our dragon glimmering in the sky, with its bat-like wings spread out, and long tail flying behind in the wind they fell on their knees and buried their faces in their hands.

We followed the railway tracks, and soon we came to the siding where we hid from the bandits in the string of freight cars. Due East from that point, we followed the trail into the mountains. The

campfire of the bandit guards at the notch in the cliffs proved a welcome beacon, for the sky grew darker every minute, and thunder rumbled in the distance. Soon the main camp became visible. The little tents looked like Chinese lanterns far below, as we circled slowly down, and red campfires dotted the ground. Somewhere down in that pit of darkness was Guy, Jed Stone's younger brother. As we circled overhead, there flashed before my mind's eye a picture of the days when as boys together, we played on the old ranch out near Winnipeg.

Suddenly the bandits saw us. Panic broke loose in the camp. Black forms rushed about—tripped, fell and fought each other, frantic with fear. I switched on the landing lights and turned on the siren whistle. The sound wailed and echoed through the mountain pass. The terror was complete!

Landing on the ground, we roared down toward the tents. The entire force of bandits seemed to have deserted and taken to the forest. Then a dark form rushed toward the tents with a flaming brand from the fire. One bandit, braver than the rest, was attempting to set the tents ablaze. We fired a few rounds from the machine gun, and evidently winged him in the foot, for he dropped the brand, and limped into the darkness.

"Hurry," I cried, "we must search the tents before they are burned. Keep the motor idling while I search. Use the machine gun if the bandits return."

Over the side I went and dashed into the first tent. The crack of rifles sounded far away in the darkness. Spat! Spat! went the bullets in the sand, but the range was wide. Then I heard Jed Stone open fire with his machine gun.

(To Be Continued.)

Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. . . . Pound and half pound tins at your grocers

work. Two subsequent examinations of the sputum also gave negative results. He has remained in good health, and has been regularly at work ever since.

The public, and more particularly the medical profession, are very loth to accept an unorthodox treatment for any serious ailment. There have been so many quack remedies and nostrums foisted on the public, that most people hesitate to experiment with remedies not endorsed by physicians. It would appear from the book that this is not a proprietary remedy, that it does not contain any secret compound, and that the motive for bringing the matter to the attention of the public is primarily with the hope that it may save many precious lives. Anyone interested may write to Charles H. Stevens, 204 Worpole Road, West Wimbledon, S.W. 20, London, England.

Take In Millions Yearly

New York Second Hand Shops Are Always Busy

Furniture, jewelry, books, clothing and office equipment—slightly, used or second hand—had total sales of \$14,000,000 for the year in 1936 stores in the five boroughs, according to an analysis issued by the Merchants' Association. The 515 stores in Manhattan do an annual business of almost \$10,000,000.

Furniture leads the field, with 256 stores selling \$2,936,000 worth of domestic essentials. Pawn shops rank next, 114 shops disposing of goods valued at \$2,750,000 annually. Second hand books, sold from thirty stores, totaled \$300,000. Sixty-five dealers selling used automobiles, and equipment did a business of \$700,000.

Fine Flying Record

Trip To Pay Treaty Money Made Over Difficult Country

Maintaining a fine record of perfect flying to schedule over most difficult country, the Indian treaty flight under the direction of the civil government air operations and commanded by Flight Lieutenant Dave Harding, has returned to Ottawa after spending 46 days in the wilds of northern Ontario and along the southern coasts of Hudson and James Bays.

Approximately 4,500 Indians were paid in accordance with the treaty with the Dominion. Census of inhabitants of the wilds of northern Ontario was also taken.

On the flight from the mouth of the Severn River to Port Albany and Moose Factory, great fields of ice were seen along the shores of Hudson Bay. At the mouth of every river emptying into the bay large schools of porpoises were photographed.

A very marked tide was observed along this particular stretch of coast, drops off from six to eight feet at low tide making the coast extremely dangerous in that the shore is low lying. When the tide ebbs, vast stretches of oozing muskeg are uncovered for as much as 10 miles to sea, it was said.

Woman Is Northern Air Pilot

One of the three aeroplanes being used in a survey of the Labrador Coast by the Grenfell Expedition is being piloted by Mrs. Joan Cotton. She is the daughter of Prof. J. D. Henry of Newfoundland, and the wife of Major Sidney Cotton, the airman, who dashed to Iceland to help in the search of Courtauld.

RECIPROCAL COURTESIES BETWEEN GANDHI AND WINSTON CHURCHILL. (A suggestion for the Round-Table Conference.)—Reynolds, in the London Morning Post.

AGREEMENT IS REACHED ON WHEAT POLICY

Ottawa, Ont.—Satisfactory arrangements have been made in connection with handling of the 1931 wheat crop. This was announced at the conclusion of the wheat conferences between Premier R. B. Bennett and western representatives.

Discussions on financial arrangements for the handling of the 1931 wheat crop were attended by representatives of several banks, including the Royal and Bank of Commerce. The bank representatives sat in with the Prime Minister, Premier J. E. Brownlee, Alberta; Hon. Howard McConnell, Provincial Treasurer and Minister of Municipal Affairs for Saskatchewan; John J. McFarland, general manager of the selling agency of the wheat pool; President A. J. McPhail, of the Saskatchewan Wheat Pool and other prairie representatives. Following conclusion of the conversations, western government and wheat pool representatives left for the west.

Ottawa, Ont.—As a result of conferences between western wheat pools, the prairie governments and the Dominion, a revised wheat marketing policy has been agreed to. In addition to Federal guarantee of operations of the trading corporation which is to handle grain marketed through pool elevators, there will be a Federal guarantee of pooled wheat to the amount of 30 cents per bushel.

In other words, the policy outlined in Premier Bennett's letter to the prairie governments will be carried through. But, in addition, the Dominion will guarantee any wheat that may be pooled to the extent of 30 cents initial payment per bushel. The position of the pool elevators this fall, therefore, will be this:

All pool farmers will be released from their pool contracts. They will be free to pool their wheat, free to sell it outright.

If they sell outright through the pool elevators, they will be paid the full market price. The transaction will be carried through by the new trading corporation. If this corporation makes any profit on the year's operation, such profit will be distributed among farmers. The trading corporation, while operating in an ordinary commercial way, will be a co-operative enterprise.

Indians Treated For Infantile Paralysis

Outbreak Of Disease At Fort George Has Been Checked

North Bay, Ont.—The outbreak of infantile paralysis among Indians at Fort George is well under control, according to word brought back from the settlement by Pilot Byrnes of the Royal Canadian air force. Byrnes landed his plane on Trout Lake near here after flying to the Indian Colony with a quantity of infantile paralysis serum.

Fort George is about 150 miles north of Moose Factory on the east shore of James Bay. The serum was rushed from Ottawa by aeroplane when word of the outbreak was received by the department of Indian Affairs. Byrnes flew to Moose Factory, picked up a physician, and then continued to Fort George.

The serum was administered immediately and it was expected by the doctor that danger of the malady spreading had been removed. Pilot Byrnes flew back to Ottawa.

Nautilus Proceeds Northward

Experts, However, Believe There Is Little Possibility Of Reaching Pole This Year

Bergen, Norway.—The Arctic submarine "Nautilus" left for Tromsø, Norway en route to Spitzbergen, but one member of the crew, sad and disheartened, remained behind.

Sir Hubert Wilkins' American cook was replaced by a Norwegian. The cook disconsolately told interviewers that he had been dropped because he was getting so fat it would be difficult for him to escape over the ice in case of emergency.

Polar experts here said there was small possibility of Wilkins reaching the pole this year.

Winnipeg Bank Robbery

Manager Fires Five Shots, But Bandits Escape With Cash

Winnipeg, Man.—In a quiet residential district of Winnipeg bank bandits injected great excitement as they held up a branch of the Royal Bank of Canada, escaping with \$1,000. The robbery occurred at the corner of Mountain Avenue and McGregor Street, in the north end of the city, the robbers gaining their freedom in a speeding automobile followed by five shots aimed at them by the manager of the bank.

Entering the establishment five minutes before closing time, the bandits forced the manager, E. L. Mundy, and teller, A. V. Monnin, into a back room.

One of the bandits thrust the cash into his pocket, then, with his companion, dashed for the door and into a waiting auto. As the holdup artists fled in the car, Manager Mundy grabbed his revolver from his desk and fired five shots at them, but none apparently struck their mark. A driver of a truck passing at the time, noticed the fleeing pair and gave chase, but the bandit car eluded the slow truck.

The robbers ripped the telephone cord at the bank before departing and police had to be called from a nearby store.

Message Of Hope

Hon. Frank Oliver Appeals For Highest Optimism Of Western People

Edmonton, Alberta.—A message of hope and faith in Canada's great northwest was left with the Edmonton Canadian Club by Hon. Frank Oliver, one of the pioneers of the west.

A subject close to his heart and with which, perhaps, none is better able to deal, Hon. Mr. Oliver dealt broadly with it and appealed for the highest optimism of western people throughout the trying readjustment now taking place.

"With our vast area; with our soil conditions that excel; with a climate that stimulates or indeed compels in large measure both mental and physical activity; with ocean ports open the year round; with the ideals of industry and thrift, of courage and endurance, of foresight and enterprise firmly planted, may we not fairly look forward to this great northwest becoming in due course and in very truth the very heart of Canada?" asked Hon. Mr. Oliver in closing an address punctuated with warm applause.

Epidemic Under Control

Spread Of Anthrax In Eastern Manitoba Believed To Be Checked

Winnipeg, Man.—Dr. Alfred Savage, Chief Animal Pathologist for Manitoba, announced that the anthrax epidemic among horses in eastern Manitoba was under control and was confident the disease would not spread. Sixteen horses used in highway construction between Rennie, Man., and Ingolf, Ont., died during the brief epidemic which was checked when serum was rushed to the area.

Both Dominion and Provincial Government veterinarians and sanitary and contagious disease officials were camped in the Rennie district, though danger of the epidemic spreading was believed to be averted. The district was still closed to the public.

Lad Shoots Officer

Ten-Year-Old Boy, Caught In Robbery, Shoots Sheriff

Lasotin, Wash.—Sheriff John Wormell, 72, was shot and killed by a 10-year-old boy, who said he had been promised \$2 and a trip to Canada for the robbery.

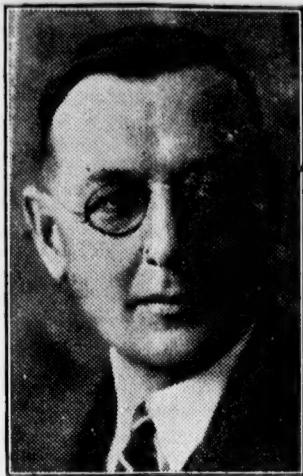

The boy, Hubert Nichols, Jr., was found robbing the Klaus Mercantile store, and was cornered by the sheriff, Deputy Wayne Bezona and Peter Klaus, owner of the store.

While the sheriff was searching the store, the deputy said, the boy, hidden behind a vinegar barrel, fired at him from a distance of five feet. The bullet pierced the officer's brain.

Young Nichols threw away his pistol and surrendered without resistance.

Agriculturists have been exempted from payment of China's new business tax.

LIVE STOCK HEAD

G. B. Rothwell of Ottawa, who has been appointed Dominion Live Stock Commissioner to succeed H. Arkell, who resigned some months ago.

Unemployment Insurance

Preparing For Establishment Of Dominion-Wide System

Calgary, Alberta.—Collection of data is now under way in preparation for establishment of a Dominion-wide system of contributory unemployment insurance stated Dr. G. D. Stanley, M.P. for Calgary East, on his return to Calgary from Ottawa.

"The Federal Government aims to have the system in operation as soon as possible, but it will not be of much benefit in the alleviation of conditions due to the present economic depression," he said.

Dr. Stanley added that the Federal Government was gathering all information available, including the census data now being tabulated, and would base its system purely on ordinary principles adopted by insurance companies. Employees, employers and the government would contribute.

Germany Cuts Budget

Finance Minister Expects Economics In All Departments

Berlin, Germany.—Vice-Chancellor Hermann Dietrich, who also is Finance Minister, asserted that every criticism of extravagance in the German Federal Budget made by S. Parker Gilbert while he was Agent-General for reparations payments has been met in the budget for 1931.

"We have cut the budget to the bone," said Dr. Dietrich, "we have gone through every department with the pruning knife, and now we can say that the 1931 budget really is one of drastic economy."

Preparing Relief Plans

Government Will Be Making Definite Announcement Shortly

Ottawa, Ont.—Highway construction will be concentrated upon throughout Canada as a means of taking care of single unemployed men. This intimation was given by Hon. G. D. Robertson, Minister of Labour in discussing the program of the government respecting unemployed relief. Preliminary conferences have already taken place with several of the provincial governments, Senator Robertson said, and within the next week or so a definite announcement may be expected as to the working out of the plan.

"The general view of the municipalities," he stated, "appears to be that they will be willing to redouble their efforts to find employment for married men providing the provinces and the Dominion provide work outside the cities for single men, particularly transients. Although the government's final decision has not been made, the probability is that highway construction will be carried on extensively to take care of men without family ties."

Until all the provinces have an opportunity to present their views, the Minister said, details on the plan, such as the amount provided for each province, nature of the construction camps to be set up and rates of wages to be paid, could not be indicated.

Will Visit West

Experts Will Study Needs Of Prairie Provinces For Farm Relief

Ottawa, Ont.—Studying the needs of the prairie provinces for farm relief, particularly Saskatchewan, a party of department officials, headed by Hon. Robert Weir, Minister of Agriculture, will leave for the west at once.

Mr. Weir will be accompanied by Prof. L. E. Kirk, newly appointed from Saskatchewan University to be Dominion Agrostologist; Dr. E. S. Archibald, director of the Dominion Experimental Farms, and J. G. Taggart, superintendent of the Experimental Farm at Swift Current.

No public meetings will be held during the visit of the department officials in the west. Instead they will visit the leading farmers in the dried out areas and discuss ways and means of aiding those in need of assistance.

It is thought that those men who, in more prosperous years, led the different communities in successful farming will be the most likely to give sound advice as to the most effective aid the governments can give.

Douglas, capital of the Isle of Man, has 1,000 less people than in 1921.

CHINESE FLOODS TAKE HEAVY TOLL OF LIFE

Hankow, China.—Floods have rolled over 16 provinces of China and uncounted thousands were reported drowned. Hundreds of thousands were homeless, threatened by famine and disease.

All central China sent stories of distress and appeals for aid. Fifty million people, the Government's relief committee estimated, were afflicted, or soon would be, by the catastrophe.

China's great rivers, the Yangtze and the Yellow, fed by swollen tributaries after torrential rains, overflowed their banks and inundated wide expanses of country.

Many cities were flood-swept. Unable to bury their dead in submerged cemeteries, the Chinese allowed bodies to float downstream.

No tally of victims was possible but the Chinese press reported "several thousand" drowned in the sister cities of Hankow, Wuchang and Han Yang and their environs. Those cities, with total population of 1,300,000, including 1,200 white foreigners, were partly under water and fighting to keep back the Yangtze and Han Rivers, which were pouring through broken dykes.

Nearly all of Hankow was flooded, but 200,000 refugees fled to higher places. Thirty thousand more were swarming daily to railway embankments and highways to join them. With pestilential conditions in refugee camps, it was feared disease would strike heavily.

Scores of Hankow homeless were taken across the two-mile-wide Yangtze to Wuchang in small boats, hoping for shelter and safety in the hills.

Never in modern times had the Yangtze reached such heights. Shipping was unable to proceed up-stream and cargoes could not be landed at docks.

Immigration Falls Off

Greatest Decrease Shown In Arrivals From Other Than Britain and U.S. Points

Ottawa, Ont.—Immigration to Canada during June showed a decrease of 76 per cent. compared with June a year ago, the figures being 3,169 and 13,171, respectively. According to a statement issued by Hon. Wesley A. Gordon, Minister of Immigration and Colonization, the total immigration to Canada in the three months, April 1 to June 30, 1931, has been 10,188, compared with 49,890 in the same three months a year ago.

The greatest decrease is shown in immigration other than that from the British Isles and the United States. The present small movement from continental Europe consists almost wholly of wives and minor children of Europeans already permanently settled in Canada.

Total immigration for the first three months of the present fiscal year, compared with the corresponding period a year ago consisted of British 3,816 compared with 16,587; United States, 4,807, compared with 9,510; other countries 1,555, compared with 23,791.

Aid For Western Churches

Support Pledged By United Church Of Canada

Toronto, Ont.—Financial support necessary to maintain 1,000 churches in Saskatchewan has been pledged by the United Church of Canada in meetings which concluded here. Gifts of clothing for needy people in the west were also promised.

The pledges followed a tour through the drouth-stricken area of southern Saskatchewan by Dr. E. H. Oliver, of Saskatoon, moderator. Arrangements have been made for a conference between Dr. R. B. Cochrane, secretary of the Home Mission Board, and leaders of the Women's Missionary Society, in order to lay relief plans.

A resolution passed by the sub-executive of the Home Mission Board declared that the board "up to the limit of its financial ability will endeavour to keep open all the churches in this area by making such grants as will enable them to carry on without hardship."

ROYAL VISITORS

Paying an extended visit to western Canada upon their return journey to their homeland, their Majesties King Prajadhipok and Queen Rambai Barni of Siam are travelling by special Canadian Pacific train to Vancouver, whence, after a short Vancouver Island cruise, they will sail on the "Empress of Canada," September 12th. In the pictures above are shown their Majesties and, below, the Banff Springs Hotel where they will reside for two weeks, during which time His Majesty will officially open the Banff Scottish Gathering.

HAVE YOU PAID YOUR SUBSCRIP-
TION YET? NOW IS THE TIME

Here and There

New Brunswick will have an
open season for partridge shoot-
ing from October 1-15 this year
according to an order issued by
Hon. L. P. D. Tilley, provincial
Minister of Lands and Mines.

Value last year of Nova Scotia
fisheries was placed at \$10,411,-
200, according to a recent Cana-
dian Government report. The
lobster and cod are of chief im-
portance.

Since the Royal Canadian Air
Force made its first experimental
flight over Lake Winnipeg in
1922, the total number of photo-
graphs taken from airplanes in
Canada is close to half a million.

Condemned to the stockyards
three years ago, Cano Paul Bruce,
mature Holstein bull, was recent-
ly crowned grand champion Hol-
stein bull of the Calgary stampede
and exhibition. He was ac-
quired from his former owner by
the Canadian Pacific Strathmore
farm and won in the railway's
colors.

To see his 28 nephews and
nieces in Canada; to return the
visit made him by the Canadian
Bishops last year; and to see the
Cathedral on Vancouver Island
are the three reasons for the two
months' visit to the Dominion of
His Lordship the Bishop of Lon-
don, Dr. A. E. Winnington-
Ingram, who arrived recently
aboard the Duchess of York.

Recent tests of the new mam-
moth Canadian Pacific locomotive
"8000", destined for heavy work
in the Canadian Rockies, have
brought results in excess of the
most sanguine expectations. It
pulled a train weighing 7,961 tons,
almost equal to three normal
trains, from Smiths Falls to
Montreal a distance of 128 miles,
without a hitch, in 5 1/2 hours and
showed over 30% fuel economy.

With a score of 266 in the
aggregate and placed 67th in "the
King's Hundred" as the first
hundred shots in the King's Prize
at Bisley are called, Sergeant Ce-
cil William Foam, of Montreal,
has just returned from the fam-
ous rifle shooting meet with
added laurels. He has made his
place in the "King's Hundred"
every year since 1929 and for the
last ten years has been employed
at the Angus Shops of the Cana-
dian Pacific Railway.

Half-way around the world in
17 days, London to Yokohama via
Canada and Honolulu, is the rec-
ord of Miss D. Bewley, of London,
who left Southampton July 8 on
the new Empress of Britain, was
rushed to Montreal by boat train
where she boarded the Imperial
Limited for Vancouver. At the
latter port she left on the Em-
press of Canada arriving at Yoko-
hama July 25. The combination
of the two ships' fast time across
the Atlantic and the Pacific
makes this trip a record between
London and the Orient.

Travelling incognito under the
name of Prince and Princess Suk-
hodaya, Their Majesties the King
and Queen of Siam with a large
suite went across Canada by Cana-
dian Pacific from Quebec where
they stayed at the Chateau Fron-
tenac, stopping for a couple of
weeks at the Banff Springs Hotel
in the heart of the Canadian Roc-
kies, where they officially opened
the Highland Gathering, then
going on to Vancouver where they
will sail by Canadian Pacific Em-
press of Canada September 12 for
the Orient. They govern a coun-
try of 225,000 square miles with a
population of about 11,500,000.

BUY AT HOME CAMPAIGN IS NEEDED HERE

What is needed in Carbon and in
many other parts of Alberta is a buy-
at-home campaign to start business on
the upturn this fall. After the harvest
there is going to be a certain amount
of money in the district and if we
can keep this cash at home and keep
it circulating there should be no ex-
cuse for hard times in a general way.
Local merchants should get behind a
plan of some sort to create a feeling
of home industry first and local orga-
nizations such as the Board of Trade
and other stagnant institutions, could
do wonders for a community if they
would take anew lease on life and en-
deavor to bring this community out
of its financial difficulties. Merchants
could get the buy-at-home spirit into
their business by displaying cards and
other advertising material so that the
customers would have every oppor-
tunity to fall in line with the general
movement. The government of British
Columbia is taking steps to create a
"Buy-in B.C." campaign, which will
no doubt do wonders in fostering the
trade in that Province. The following
press despatch tells of the plan as
fostered by the B.C. Government:

"The Provincial Government last
week launched a campaign to promote
the sale of goods made in British Co-
lumbia.

"On all Government purchases in
the Province, the Government will in-
sist that wherever a British Columbia
product of any description could be
secured, it must be bought in pre-
ference to an imported article.

Where British Columbia goods can
not be obtained, officials were instruc-
ted to give preference to Canadian
goods and, failing that, to buy British
Empire goods. In all cases, goods pro-
duced by white labor will be favored.

"Coupled with its instructions to its
own officials, the Government issued
a strong appeal to every citizen of the
Province to insist on local goods.

"The doctrine of buying in British
Columbia will be preached all over
the Province by members of the Gov-
ernment during the next few months."

A SAFE INVESTMENT

If we were endeavoring to advertise
a newspaper and secure subscriptions,
we should make use of the fact that
every newspaper pays its own way
into the subscriber's home and really
costs him nothing. The point is that
it returns him more dollars and cents
than he pays for it. We cannot im-
agine a publication so worthless that
some item of information in it, some
bargain advertised or some service
performed is not worth more to the
subscriber in real money than the cost
of its subscription.

Almost every newspaper puts money
into the pockets of non-subscribers.
This is continuously the case when the
newspaper lends or supports any move-
ment which brings trade to the town
in which it is published. It is the case
when the newspaper hammers at local

improvements—the spending of a dollar
that two may grow in its place to-
morrow.

The weekly newspaper, at two dol-
lars a year costs the subscriber four
cents an issue. We defy anyone to
point out where the subscriber can
spend four cents and get an equal
amount of pleasure and real value.
Four cents will not buy much of any-
thing else, but it will buy a week's
news of the community and supply
other information and service that is
likely to be worth many dollars to the
reader. No other institution in the
world expects so little and returns so
much as does the weekly newspaper.
—Collingwood Bulletin.

Publication of false advertisements
now carries a penalty of \$200 and six
months imprisonment under the new
change. A saving clause relieves from
conviction anyone publishing an ad-
vertisement in good faith. As originally
drafted the saving clause only applied
to newspapers, but on suggestion of
Hon. Chas. Marcell (Liberal, Bonadventure)
the clause was extended to cover
printers and others. Another section
provides penalties for anyone who
sells or uses living bacteria as rat
poison. The section aimed at chicken
stealing provides a penalty of \$50 and
a maximum of two years' imprison-
ment.

THERE IS NO GOOD REASON

WHY ALBERTA WHEAT POOL MEMBERS
SHOULD NOT DELIVER ALL THEIR GRAIN TO

ALBERTA POOL ELEVATORS

UNDER THE SYSTEM NOW IN EFFECT, ALBERTA WHEAT
POOL WILL GIVE MEMBERS THE OPTION:

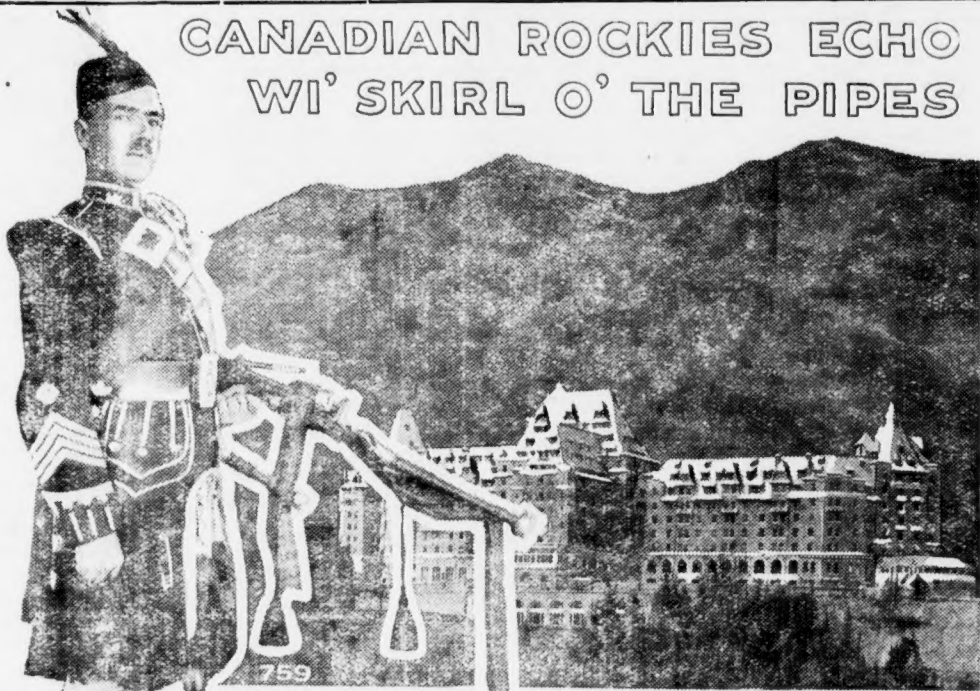

- (1) Of delivering their wheat on a Pool basis, accepting the pre-
vailing initial payment, and participating in any future pay-
ments which may accrue from the pooling thereof; or
- (2) Of disposing of their wheat under any of the methods pro-
vided by The Canada Grain Act and obtaining full current
market price for the same.

ANY PORTION OF A MEMBER'S WHEAT MAY BE POOLED
OR ANY PORTION SOLD OUTRIGHT FOR CASH.

COARSE GRAINS will be handled by Pool Elevators on a commer-
cial basis only, full cash payment being made as during past year.

Your patronage of Pool Elevators will preserve Alberta grain pro-
ducers a grower-controlled, co-operative elevator system that has
abundantly proven its value.

CANADIAN ROCKIES ECHO WI' SKIRL O' THE PIPES

From the four corners of
Canada and from across
the seas, men, women and
children of Scotch ancestry
are preparing to meet at
the Canadian Pacific Rail-
way's palatial Banff Springs
Hotel, Banff, Alta., for the
annual Highland Gather-
ing, August 27-30, 1931.
The event, which has be-
come historic, is under the
distinguished patronage of H.R.H. the Prince
of Wales and will be formally opened by H.R.H.
Prince Sukhodaya of Siam. A feature of this year's
program will be the inter-regimental piping com-

petition between representatives of the 17 Highland
Regiments in Canada. There will also be the other
bagpipe competitions and displays which have made
the Gathering famous, as well as dancing and high-
land games. The meeting always draws a large
gallery, in addition to the army of costumed par-
ticipants. Juvenile competitions in piping and
dancing are particularly attractive. In addition to
the regular events, two Scotch light operas: "Prince
Charming" and "Prince Charlie and Flora" will be
presented by members of the resident company.
The setting is ideal for the Gathering; the peaks of
the famous Canadian Rockies, with their gracious
valleys and spray-flecked streams forming a magni-
ficent background for the Banff Springs Hotel,
which is built in the Scotch baronial style.

CHAPTER XXVI.—Continued

It was there that Simeon found her, coming in from the garden at a frantic summons from the maid, who had heard Gay's cry. The old man perceived the yellow envelope on the floor, and thought: "God help us! she has had bad news."

Then he saw that it was unopened, and hastily tore at it with queerly fumbling hands. What he read caused him to drop on his knees beside Gay's pallid form, crying, as he tenderly chafed her hands: "Dearie, it's good news! He's safe! Wake up, Gay—wake up and let Uncle Sim tell you. . . . Nick's safe! Can't you hear, dearie? He's safe. Can't you hear Uncle Sim at all?"

It was the doctor who pushed Simeon aside. How he got there the old man didn't know. He said, his hand on Gay's pulse: "She's coming round, but we must get her to bed. This means mischief, I fear. It's lucky she was there when she fainted. If she'd had a fall—still, it's bad enough as it is; but when she knows the truth about that message it will give her a new lease of life, and seven-month babies sometimes turn out as husky as any others. I'll leave her here while I telephone the nurse, though she may not arrive in time. She's just off a case in Brattleboro."

He bent over the patient anxiously. Her eyes fluttered open—then closed.

"Gay," he said gently, "wake up. Your husband's safe. He'll be here within a week, Gay. . . ."

She was looking at him now, but with an expression that brought a chill to the doctor's heart. They were Gay's eyes, yet. . . .

"He's—gone," she whispered. "He's never coming home—never, never again."

"No—no!" cried Simeon brokenly, "that ain't true, dearie."

"Hush!" warned the doctor. He knelt down, and softly stroked her hand. "Gay," he said gently, "listen to me. Nick's safe. He'll be here in a day or two. You misunderstand. I—"

She struggled wildly up.

"Don't lie to me! Don't—don't! Didn't I see the message? It was addressed . . . Oh, why do you try to deceive me? He's gone—drowned—my Nick! There are sharks in those waters. I know. Haven't I thought of it nights when I couldn't sleep? Haven't I seen him—his hair all wet. . . ."

She sank back, blessedly unconscious again.

BLACKHEADS

Don't suffer any longer from these unsightly blemishes. Overcome them at home! Get 2 oz. Peroxine Powder from your druggist. Sprinkle a little on the face cloth, apply with a circular motion and the blackheads will be all WASHED AWAY. Satisfaction or money returned.

W. N. U. 1902

Six hours later her little girl was born.

CHAPTER XXVII.

Strangely, the only member of the party who felt any regret at leaving their island refuge, was Angela. In the hours when Nick was absent from camp, building his signal fire, she had made elaborate plans for his conquest. Always optimistic regarding the power of her own charms, she reached the conclusion that it was absurd to consider as a rival, a wife who was thousands of miles away. Give her a few weeks more and Nick Hastings would put his arms about her because he wished to. It would not be necessary to simulate a fall, as she had done that night aboard the Sea Bird.

But something must be done to prevent him from starting out in the small boat. Perhaps she could arrange it by suggesting to Amy Myer that, because of his dependent family, it was Nick's duty to stay in the safest place. She might give Amy a hint about the coming baby, telling her that it was Gay's wish for Nick not to know, and thereby gain an ally when it came to deciding who should leave, and who should stay behind.

She might even manage so that Colonel Nowell, whose repeated tales of Painter's Neck made her shudder, should be the one to go. He was no longer young, and had no family to care whether he came back or not. With the complacency of a woman who always managed, by fair means or foul, to get her own way, Angela laid her plans. When only a few hours later, she beheld the light of the approaching vessel, her emotions were a strange mingling of relief and anger; but when she realized who was their liberator she was seized with a rage that drove the color from her face, and it was with difficulty that she controlled herself sufficiently to surrender to the embrace her husband offered.

Nick had hardly spoken to her since they embarked. He had spent much time tramping the deck with Halliday, or reading and re-reading the letter that Halliday had brought. Perhaps, had Angela seen that letter, even her warped spirit would have understood why Nick had been so unyielding to her charms. Gay had said that the writing of it "eased her heart"; and the reading of it eased Nick's of a burden that had been growing unbearable. He drank of it eagerly, and often, as one who has suffered thirst. Gay understood—she always would understand.

So while Nick exulted, Angela was feeling ill-used and irritated. They were, she knew, headed straight for Florida, where they would drop Nick at Miami. He would go home by rail, while the rest of them were to proceed leisurely to Boston and deliver the yacht to its owner, who had gone North.

In chagrin at her frustrated plans, Angela forgot that she abominated camping, and felt vaguely aggrieved that her husband should have found them so soon. It gave her a personal grudge against him, which ripened as he continued to treat her with what she chose to call an unnatural courtesy and consideration.

"He has an axe of some sort to grind," she mused, as she looked moodily out to sea. "He hasn't scolded me once, or said anything sarcastic. Nor has he talked about that wretched child he's so wrapped up in, though I heard him telling Nick some wonderful thing she'd said. He acts as foolish as a young father; and I believe he encourages her to call him Daddy! Well, if she tries that stunt with me, I'll put her in her proper place! And if he adopts her legally. . . ."

Thoughts such as these were fuel to Angela's smoldering anger at the fate which seemed to have snatched Nick from her hands. And that fate was Halliday. She longed to punish him. She would punish him if the chance came. And she would punish Nick Hastings, too, for his lofty indifference. If she could punish them both—at one stroke. . . . Her eyes brightened malevolently. Why, she could! It would be the easiest thing in the world if the opportunity arose. . . .

It arose next day.

It was a warm and balmy afternoon. Amy Myer was playing checkers with her little girl, and Angela had gone to the other side of the boat, where she was gazing into the water, idly wondering if its shade of blue would be becoming for a new evening gown. After a few moments the Colonel joined her. Deep in her plans for a new gown, Angela smiled

UNIVERSITY OF MANITOBA WINNIPEG

Offers, among others, the following Courses:

Through its FACULTY OF ARTS AND SCIENCE courses leading to the degrees of B.A. and M.A., and B.Sc., including B.Sc. (Pharm.), and M.Sc. Through its FACULTY OF ENGINEERING AND ARCHITECTURE courses leading to the degrees of B.Sc. (C.E.), B.Sc. (E.E.), M.Sc. and B.Arch.

Through its FACULTY OF MEDICINE courses leading to the degree of M.D. and C.M.

W. J. SPENCE, Registrar,
University of Manitoba, Winnipeg.

absently, and thus encouraged he began on one of his reminiscences.

This reminds me of the last cruise I ever took," he said affably. "Started from Bar Harbour—"

Angela stirred uneasily, wishing that Colonel Nowell had never heard of the state of Maine. Probably his cruise would end at Painter's Neck. He was forever going to Painter's Neck—by steam, by automobile, or by water. It was with relief that she saw Nick and her husband coming toward them. She interrupted the Colonel's narrative to greet them with unusual graciousness; but Colonel Nowell once started, was not to be side-tracked.

"Just telling your wife about the first cruise I ever took," he resumed tirelessly. "You familiar with Maine, Halliday? Great state. Finest coast in the world. Ever heard of a place called Painter's Neck?"

It seemed to Nick that for a perceptible moment Halliday hesitated; then, moving nearer to Angela, he said quietly: "Yes. I know the place."

"Really?" The Colonel appeared a bit surprised. "Went there before your marriage, I suppose."

Angela cast a frightened glance at her husband; but he said casually: "No. We had a house there one summer. This is a wonderful day to be on the water, isn't it? But after all, I think I prefer the mountains. Ever been to the White Mountains, Colonel?"

"Why—er—yes," came feebly from Colonel Nowell. For once he seemed to grope for words. His eyes sought Nick's inquiringly, but did not meet them because Nick was intent on Angela's hands, clutching the rail so rigidly that the veins stood out in harsh, unlovely lines. Then Halliday moved closer, laying one of his hands on hers, protectively.

"Let's sit down," he suggested, and seating his wife courteously, took the chair beside her.

The Colonel tried once more to meet Nick's gaze, and failing, said, with a return of his old, jaunty manner: "Well, guess I'll go 'round the other side and get a nap. This air makes me sleepy. See you later, folks."

(To Be Continued.)

Keeping the Sea Clean

Britain Considering Bill To Prevent Oil Discharge From Ships

The House of Commons gave first reading to a bill, introduced by Sir Cooper Dawson, Cons., Brighton, designed to keep the seas clean. The bill would require oil-carrying ships to free their liquid discharge from oil.

Sir Cooper estimates that 2,000,000 tons of crude oil were discharged from oil ships into the sea every day. This oil drifted to coasts, damaging fisheries and despoiling sea resorts.

"If Britannia cannot rule the waves, that's no reason why we shouldn't keep them clean," he said, as members cheered the bill on its way.

HEADACHE?

Why suffer when relief is prompt and harmless:

Millions of people have learned to depend on Aspirin tablets to relieve a sudden headache. They know it eases the pain so quickly. And that it is so harmless. Genuine Aspirin tablets never harm the heart. Read directions in package for headache, neuralgia, summer colds, pain of all kinds.

Free Lectures On Health Subjects Given By Canadian Social Hygiene Council

The Canadian Social Hygiene Council's Free Radio College of Health has just concluded its third annual term. It is the only college of the ether—unique also because it has no bursar, buildings nor books, no fees, degrees or examinations and only one subject—health.

This term, thousands of Canadians on farms, and in villages, towns and cities from coast to coast have heard the voices of lecturers telling them how to prevent diphtheria, typhoid fever, how to beware the early signs of cancer and how to seek health through nature's greatest medicine—sunlight.

Thirty lectures in all have been given and the entire course has been as free as the ether that carried its messages. Sixteen radio stations and scores of daily and weekly newspapers have given free time and free space to the lectures and these were provided free by the Canadian Social Hygiene Council. The result has been a "college" with an unprecedentedly low running-cost, its only endowment good-will, its lecture-halls the homes of the Canadian public. The response of this vast, invisible class is attested by letters from every corner of Canada. Lectures were delivered in French and English.

The importance of pure milk, the saving of child life through proper care and feedings, mental hygiene, prevention and cure of tuberculosis, the need for regular physical examinations, these and other subjects close to the life of the average Canadian, were dealt with.

THE RHYMING OPTIMIST

—By Aline Michaelis—

THE SEEKER

He is a seeker, let him go
Still seeking what he does not know,
A prey to hunger and despair,
As up and down the world he fares
A flame keeps burning in his breast
That will not give him peace or rest.

He is a seeker and he finds
In every path that turns and winds
A hint, a glimmering, a trace
Of that which flees from his embrace,
Of that which makes life dear alone,
The joy supreme, the joy unknown.

He is a seeker . . . unpossessed
Always the object of his quest;
His goal ungrasped, his dream denied,
Yet joy goes ever by his side,
For only one who seeks the light
Of some white star across the night,
Some glow from other realms than this
Can know the utmost heights of bliss.

Sweet and palatable, Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

The Woman Motorist

Practice Making Her As Perfect Driver As a Man

The proof of the pudding is in the eating. The old gibes against the woman motorist are dying before our eyes for the mere reason that the number of women drivers is increasing at so astonishing a rate. There is not much more sense in saying that women are congenitally incapable of driving a motor car than in arguing that men are debarred by their sex from learning to knit or to sew if they wish to do so. It is a matter of practice making perfect in both cases. And in the case of the vast majority of women motorists practice is making as nearly perfect as the average male driver at any rate.

Must Keep Pets Quiet

The city health officer at Poughkeepsie, N.Y., has issued orders to the owners, respectively, of a rooster, a parrot, and a flock of cooing pigeons to muffle the birds or get rid of them. Residents of the city have complained about the noise of the birds.

Housewife—I haven't much to eat in the house, but would you like some cake?

Tramp—Yes.

Housewife—Yes what?

Tramp—Yes, dear.

HER HUSBAND TEASED HER

But not for long!

"I started taking Kruschen Salts for biliousness, and for the last two years I have been perfectly free from an attack. Now I continue to take them, as I find they keep me in perfect health. My husband used to joke about me taking Kruschen Salts; now he takes them himself, so do my children. My sincere thanks."

—Mrs. G. P.
When your gastric or digestive juices refuse to flow, your food, instead of becoming absorbed into your system, simply collects and ferments inside you, producing harmful acids and gases which give rise to biliousness, heartburn and flatulence.

Kruschen is a combination of six mineral salts, which goes right to the root of the trouble. It first stimulates the flow of gastric and other juices to aid digestion, and then ensures complete, regular and unflinching elimination of waste matter every day. And that means a blessed end to biliousness, and a renewed and whole-hearted enjoyment of your food without the slightest fear of having to pay the old painful penalty.

Little Helps For This Week

"If we love one another, God dwelleth in us, and His love is perfected in us."—1 John iv. 12.

"More blessed 'tis to give than to receive."

No more,—no mystic dogma to believe,

Only a thread in each day's life to weave;

Only a common duty, in such wise

Transfigured by new light, that

Saw how above all truth true loving lies;

Saw that, forgetful of my own soul's need,

Filling my life with gracious thought and deed,

I might leave time—and God—to shape by creed.

—Littell's Living Age.

They ask me for secrets of salvation. For myself I know no secrets but this,—to love God with all our hearts and our neighbor as ourselves. —Saint Francis de Sales.

Douglas' Egyptian Liniment is remarkable in its quick, effective action. Relieves instantly burns, sprains, toothache and neuralgia. Invaluable for sore throat, croup and quinsy.

Canada Secures Space

Government Will Exhibit Next Year At British Industries Fair

It is announced by the Department of Trade and Commerce at Ottawa, that reservation of a Canadian section at the Birmingham section of the British Industries Fair next year has been made by the Canadian Exhibition Commission. The same space as was held this year has been secured and is located in the heart of the show. Considerable attention has been attracted in past years to the Canadian Government exhibit, which is the only one of its kind from the overseas Dominions and Colonies.

Smarter Than Teacher

The teacher wanted to know why Jim had absented himself from school for a whole week.

"But he's past his fourteenth year, ain't he?" said Jim's mother, "and me and his father think he's had schoolin' enough."

"Nonsense," said the teacher. "I didn't finish my education till I was eighteen."

"Oh," said Jim's mother, "but Jim's got brains."

Aching

CORNS STOP HURTING

INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "Putnam's" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store, 35c.

Personalographs**Born, to Mr. and Mrs. John McLean
of Craigville, a daughter on August
2nd.Miss Tobin arrived Thursday even-
ing and is spending a couple of weeks
as the guest of Mr. and Mrs. Jas.
O'Rourke.Mr. and Mrs. J. J. Greenan and fam-
ily motored to Edmonton on Friday
and returned Sunday.Mrs. J. H. McClure arrived last week
from Drumheller and is visiting at the
home of Mr. and Mrs. W. Van Loon.Mrs. Mary Johnson returned from
Edmonton last Thursday, after spend-
ing the past two months at that point.Born, to Mr. and Mrs. M. McKinley
in the Drumheller hospital on August
4th, a son.Frank Emery returned from South-
ern Alberta on Saturday last and re-
ports poor crops in many parts. In
some cases the grain is only about
six inches high and with such dry
weather this has headed out and is
now being cut for feed and wherever
possible, the farmer is endeavoring to
thresh enough grain out of the mess
for seed.Mr. and Mrs. Geo. Malton and chil-
dren motored to Medicine Hat on Sun-
day last and visited with Mrs. Mac-
Donald. Molly will visit there for a
couple of weeks, but the rest of the
family returned home Sunday night.The mines at Carbon are commencing
to operate on fall business and it
is expected that as the coal season ap-
proaches that they will operate full
time.I. Guttman motored to Calgary on
Wednesday and took his nephew, Joe,
Silver with him. Joe has been visiting
in Carbon for the past couple of weeks
and will remain in the city.**WANTED TO RENT** — Small Grain

temperature has been around 90 in the
shade the past few days. Crops in the
district are suffering from lack of
moisture and grain is ripening rapidly.
Growth is slow now and pastures are
not coming as fast as they should be
if the pasture is to hold out until fall.**FEDERAL AID FOR SHEEP RAISER**The supply of pure bred rams at
stated prices and payments of freight
to destination are the outstanding fea-
tures of direct benefit to the ram club
policy announced by the Hon. Robert
Weir recently. Under this policy the
federal department of Agriculture un-
dertakes to supply at stated prices
graded rams as ordered by club mem-
bers, assuming payment for any ad-
ditional cost over the stated price. The
department also pays freight charges
to the nearest railway station to the
club.October 1st is the final date up to
which orders for graded rams may be
placed with the department in any
year. The department reserves the
right to limit the number of clubs
which may be formed in any year, and
also makes special provision for sup-
plying club members in any new out-
lying districts.The prices at which pure-bred rams
will be supplied to club members are:
For three star lambs \$10; for three
star shearing rams \$20; for two star
ram lambs \$5; and for two star shear-
ing rams \$15.Ram clubs comprise not less than
ten sheep raisers in a community,
owning not less than ten ewes each.
Not more than four rams may be sup-
plied to any one member, and if order-
ing more than one one ram the
member must own at least twenty-five
ewes for each ram ordered.The object of the policy is to develop
uniform breeding on a community ba-
sis and with this in view club members
will be expected to confine their orders
to a breed to be agreed upon as best
suited to the community.Considerable savings to sheep rais-
ers are assured under the terms of the
policy, as the cost of pure-bred ram
lambs and shearings of the grades
specified will in most cases be higher
than the stated price at which they
are being supplied to club members,
the department paying the difference.**SALE AND REDEMPTION OF
IMPOUNDED ANIMALS (Sec. 48)**Notice is hereby given under Sec-
tion 48 of The Domestic Animals Act
(Municipalities) that one black mare,
weight about 1400 pounds, branded
on left hipwas impounded in the pound kept by
L. B. Hart, of Carbon Alberta, located
on the S.W. 14-30-23 w4th, on Friday
the 24th day of July, A. D. 1931, and
that said animal was sold on the 3rd
day of August 1931, to Arthur Hud-
son of Carbon, Alberta, and that said
animal may be redeemed by the owner
or on his behalf within a period of
thirty days from the publication of
this notice in The Alberta Gazette,
upon payment of all fees and costs
due to the municipality and the pur-
chaser of said animal.For further information apply to
the undersigned.
